

WELLSPRING® | SOLAR ENERGY

Proud Supporter of Solar Energy

What is Wellspring® Solar Energy ?

Wellspring® Solar Energy is a voluntary program offered to our members. The renewable solar energy is supplied by Todd-Wadena Electric Cooperative's (TWEC) wholesale power supplier, Great River Energy (GRE). While the electricity delivered to all homes and businesses includes renewable energy in the mix, participating in Wellspring is a way for members to provide additional support for renewable energy technologies.

How does Wellspring® Solar Energy work?

TWEC members can participate voluntarily in Wellspring for as little as \$2.00 per month (in addition to the electricity charges you would otherwise pay) by choosing to buy additional solar energy in 100 kWh blocks. Members may choose to purchase a single block, or enough blocks to equal their normal monthly electric usage. We require a one-year commitment. The Wellspring charge will show up right on your monthly energy bill.

SIGN ME UP FOR SOLAR ENERGY

Yes, sign me up for Wellspring® Solar Energy from Todd-Wadena Electric Cooperative. I understand the cost per block is \$2.00, in addition to my normal electric rate, and the minimum subscription is one year.
