

Cooling System Tune-up

The best way to ensure efficient operation of your central air conditioner (CAC) or air-source heat pump (ASHP) is by having it tuned-up every two years. A tune-up by a service expert can improve your unit's efficiency by as much as 20%, extend its life, and help protect our environment. Contact a local HVAC service contractor. After completing the tune-up, have your contractor fill out the contractor portion of the rebate below.
